

**Laboratory of Bioinformatics - External price list**

Head: Michał Dąbrowski (m.dabrowski@nencki.edu.pl)

No.	Service type	Service type	Academic partners Price net* (PLN)	Commercial partners Price net* (PLN)
1	Support for large-scale proteomic methods: parsing of result files, database support, statistical analysis, functional analysis and visualization.	1 dataset	7.000,00	8.750,00
2	Support for large-scale microarray methods (supported by R / Bioconductor): preprocessing, statistical analysis, functional analysis and visualization.	1 dataset	7.000,00	8.750,00
3	Support of large-scale genomic methods (RNA-seq, CHIP-seq, DNase-seq): filtration, alignment, mapping, statistical and functional analysis and visualization.	1 dataset	9.800,00	12.250,00
4	Statistical analysis and imaging of multidimensional data.	1 dataset	7.000,00	8.750,00
5	Analysis and visualization of gene regulatory areas using the Nencki Genomics Database (human, mouse, rat).	1 gene or 1 query	280,00	350,00
6	Simulations of molecular dynamics of proteins with a known 3D structure: preparation, simulations and analysis of trajectories.	1 protein	7.000,00	8.750,00

**\*Total cost of service includes net price + 23% VAT**
